Connection

Powered by the + and - poles of the vehicle battery.

Default configuration

1 position / 30 seconds

The GPS tracker sends a position every 30 seconds. In standby mode, it sends one position per day. If you want to space the positions further apart, please contact us to configure this remotely.

Options

- Batch configuration of alerts from a CSV file.
- BLE tag: driver identification via Bluetooth

Mounting options

Double-sided adhesive tape is included with purchase.

Installation recommendations and optimisation

Positioning

The GPS tracker is powered using the positive (+) and negative (-) poles of the vehicle's battery. This battery is usually located under the bonnet of the vehicle or under the driver's seat. You can also connect the tracker to other batteries, such as a boat battery. We recommend that you use the double-sided adhesive tape supplied to attach the GPS tracker.
